MEMORANDUM FOR THE RECORD

SUBJECT: Objectives

At USIB the proposal was made to insert a milestone under sub-objective 2A which would call for an assessment of our capability to monitor SALT after one year of experience. There is much debate about this, but we need to consider it with DCI in our changes suggested.

Also -- Treasury feels resource management objectives are "incestuous," and asks that we include words about formally acquiring consumer feedback. Let's work over the language.
